Waterworks

Cla-Val Model 100-01 Hytrol Valve

The main valve for Cla-Val Automatic Control Valves. It is a hydraulically operated, diaphragm-actuated, globe or angle pattern valve.

Available In

GE - Full Bore | NGE - Reduced Bore

100-CF1
On/Off Float Level Control

270-01
Altitude Level Control

60-31/02
Pump Control

Minimal parts, easy to repair.

This valve consists of three major components: body, diaphragm assembly, and cover. The diaphragm assembly is the only moving part. The diaphragm assembly uses a diaphragm of nylon fabric bonded with synthetic rubber. A synthetic rubber disc, contained on three and one half sides by a disc retainer and disc guide, forms a seal with the valve seat when pressure is applied above the diaphragm. The diaphragm assembly forms a sealed chamber in the upper portion of the valve, separating operating pressure from line pressure.

The Cla-Val Co. Model 100-01 Hytrol Valve requires no lubrication or packing and a minimum of maintenance. However, a periodic inspection schedule should be established to determine how the operating conditions of the system are affecting the valve. The effect of these actions must be determined by inspection.

Take Control Of Your System

The CLA-VAL D35 is a battery powered autonomous Electronic Valve Controller capable of activating a CLA-VAL valve according to programmed rules. e.g. Time based open-close valve command or high and low pressure set-points. The D35 includes an option for Multi-channel data-logging, combined with the CLA-VAL Link2Valves platform allows remote valve diagnostic and control.

Mining & Industrial

More than 50 metals including:

Alloy steel, Aluminum, Aluminum Bronze, Ductile Iron, Ductile Ni-resist, Cast Steel, Monel, Red Brass, SIL Bronze, Naval Bronze, Nickle Aluminum Bronze, Stainless Steel, Super Duplex Stainless Steel, Super Austenetic Stainless Steel

We Also Supply

Data Loggers
and Controllers

Turbines

Position Indicators

Strainers

Motorised Pilots

Hydraulic Pilots

Anti Cavitation

Hydraulic Fittings

Repair Kits
and Spare Parts

Asset Management
and Sizing Software

Fire Protection

Simple, Reliable & Accurate

The Cla-Val Model 100G/2100G Deluge Valve is designed for use in controlling water flow to Deluge, Pre-Action, or Foam-Water type fire protection sprinkler systems.

This valve is UL Listed in "Special Systems Water Control Valves Class I (VLFT) for both vertical and horizontal installation applications. This valve is UL/ULC Listed for operation manually, electronically, with hydraulic or pneumatic pilot control system for a wet pilot line of sprinklers.
